

MITER DUST REMOVAL AIRDUSTER 4 1/2" - 5"

Product Code: MAD45115AG006

Availability: In Stock

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Price: CA\$40.00

Description

MITER DUST REMOVAL AIRDUSTER

Louis was a seasoned tile setter with years of experience under his belt. He had seen it all - from intricate mosaics to large-scale commercial installations. But despite his expertise, he knew that one of the biggest challenges he faced was dealing with dust.

When he was cutting tile, the dust would fly everywhere, making it hard for him to see what he was doing and causing his eyes to get irritated. And let's not forget about the mess it made on his tools and equipment!

One day, Louis heard about the DUST REMOVAL AIRDUSTER, a new tool that was designed TM MECHANIC specifically for use with angle grinders.

Here are the top 5 benefits that Louis experienced with the AIRDUSTER 4 1/2" - 5":

- **Effortless Dust Removal:** The AIRDUSTER 115-125 made it easy for Louis to remove dust from his angle grinder, reducing the risk of inhaling harmful particles and keeping his workspace clean.
- **Universal Compatibility:** The tool's universal fastening system made it easy for Louis to attach it to any angle grinder, without worrying about compatibility issues.
- **Active Blade Cooling:** The AIRDUSTER 115-125's active blade cooling system helped to keep Louis's tools running smoothly and prevent overheating, ensuring that his work remained consistent and high-quality.

- **Visual Control of Cutting Zone:** The tool's visual control feature allowed Louis to see exactly where he was cutting, making it easier to achieve precise cuts and reduce errors.
- **Improved Workspace Efficiency:** With the AIRDUSTER 115-125, Louis was able to cut tile quickly and efficiently, reducing the time it took to complete his projects and allowing him to take on more work. It promised to make quick work of dust removal, and Louis was intrigued.

He decided to give it a try and was amazed at how easily it picked up the dust and debris. The open construction of the device allowed for excellent airflow, and the active blade cooling feature helped to keep his grinder running smoothly.

Overall, Louis was thrilled with the performance of the AIRDUSTER 115-125 and would highly recommend it to any tile setter looking for a reliable and efficient solution for dust removal during tile cutting.
