

DIAMOND BLADE 1A1R 10" EDGE

Product Code: EDG250WS008

Availability: 100

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Price: CA\$130.00

Description

DIAMOND BLADE 1A1R 10" EDGE

Louis's Story: How the Diamond Blade Helped Him Create a Masterpiece from Porcelain Stoneware and Marble Mosaic

Louis was a recognized master of his craft. His works in granite and marble were renowned for their elegance and quality, adorning many cities. His talent and skill were highly praised by clients across the country. One day, Louis received an exceptionally interesting order from another city to create complex elements for a luxurious building made of marble and granite. To fulfill this order at the highest level, Louis decided to use the DIAMOND BLADE 1A1R 7" EDGE, designed for precise cutting of porcelain stoneware and marble mosaic at a 45-degree angle.

Description

- **Rigid casing:** The thickened hub makes the disc extremely rigid, preventing it from deviating during operation.
- **High diamond layer:** The disc has a 1-inch high diamond layer, which ensures durability and high cutting performance.
- **Balanced:** The disc is excellently balanced, providing smooth and precise operation without vibrations.
- **Special diamond layer construction:** The disc's diamond layer consists of large diamonds in the center and small diamonds at the edges, providing high performance and a clean edge polish simultaneously.
- **Universal application:** The 1A1R Edge disc effectively works not only with porcelain stoneware but also with ceramic tiles and other materials.
- **Use with tile cutters:** The disc is designed to work on tile cutter machines with

water cooling, providing optimal cutting conditions.

The project required meticulous work and precision. Louis spent many hours to ensure that each element was perfectly processed. With the help of the 1A1R Edge diamond blade, he was able to achieve perfect angles and clean cuts, which was a key requirement of the customer.

After completing the work, Louis was praised for his skill and quality of work. His works became an adornment of the new building, and he was invited to undertake new projects in this city. Louis's story became an example of how with the help of quality tools and skill, one can create works of art from the hardest materials."
