

DIAMOND BLADE 1A1R 10" EDGE

Brand: Distar

Product Code: EDG250WS008

Availability: In Stock

Dimensions: 0.00in x 0.00in x 0.00in

Price: CA\$130.00

Short Description

The DIAMOND BLADE 1A1R 10" EDGE delivers precise and clean 45° cuts for gres tiles, porcelain stoneware, and marble mosaics. Designed for durability and high performance, it's the ultimate tool for professional results

Description

The **DIAMOND BLADE 1A1R 10" EDGE** is engineered to meet the demands of precise 45° cutting in larger tiles and porcelain stoneware. Its innovative diamond layer and reinforced core guarantee clean edges, exceptional cutting performance, and long-lasting durability.

Key Features

- **Advanced Diamond Technology:** A sandwich-style diamond layer combines coarse diamonds at the center for high cutting efficiency and fine diamonds at the edges for smooth polishing.
- **Reinforced Core Design:** A thickened hub provides added rigidity, ensuring precise and stable cuts with no deviations.

- **Balanced Operation:** The blade's optimized balance minimizes vibrations, delivering smooth, consistent performance.
- **Versatile Applications:** Perfect for gres tiles, porcelain stoneware, ceramic tiles, and marble mosaics.
- **Designed for Water-Cooled Systems:** Works seamlessly with water-cooled tile cutter machines for enhanced cutting performance and blade longevity.

Applications

- **45° Beveled Edge Cutting:** Ideal for creating perfect miters on larger gres and porcelain tiles.
- **Professional Mosaic Work:** Delivers clean edges for intricate marble and tile designs.
- **High-End Tile Installations:** Ensures a polished, professional finish every time.

Technical Specifications

- **Blade Diameter:** 10" (250 mm)
- **Diamond Layer Height:** 1 inch
- **Cutting Angle:** 45°
- **Compatibility:** Designed for tile cutter machines with water cooling systems.

Why Choose the DIAMOND BLADE 1A1R 10" EDGE?

This blade is the ideal choice for professional tile setters working on larger tiles and intricate designs. With its innovative diamond layer, reinforced core, and water-cooled compatibility, it guarantees exceptional results with every use. Its precision and durability make it a trusted tool for demanding tile installation projects.
